

LIVE VIEW DVR ANDROID MOBILE APP

Download CMSV7

Play Store - CMSV7

NOTE: VEHICLES MUST BE ONLINE TO VIEW/DOWNLOAD VIDEO

Click the Icon, enter your username and password. Then enter the ServerIP and Select Log on

Once logged in you will be greeted with the map view where the location of all your vehicles will be displayed.

You can search for specific vehicles by entering its Reg in the search box at the top of the screen.

There will be a coloured vehicle Icon next to each Reg to indicate its Status:

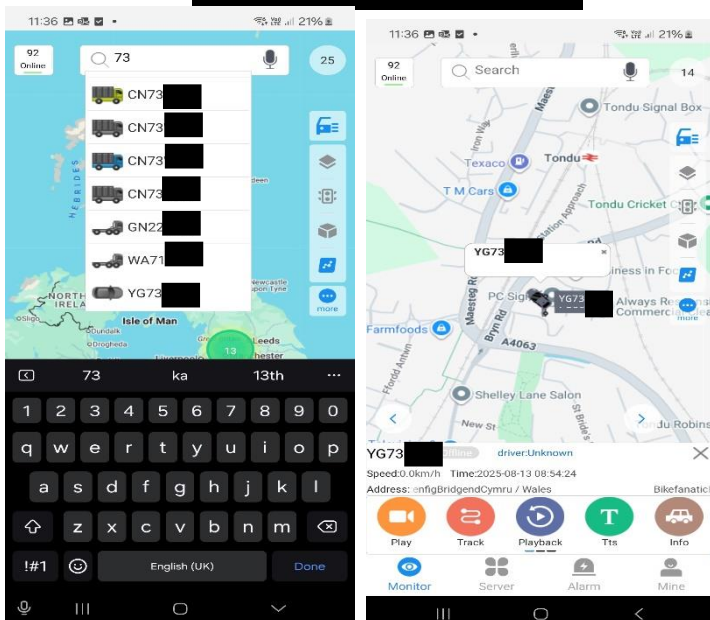

Vehicles highlighted in **GREEN** will be online

Vehicles in **GREY** are offline

Vehicles in **RED** can indicate an issue, such as camera failure, GPS or hard drive issue

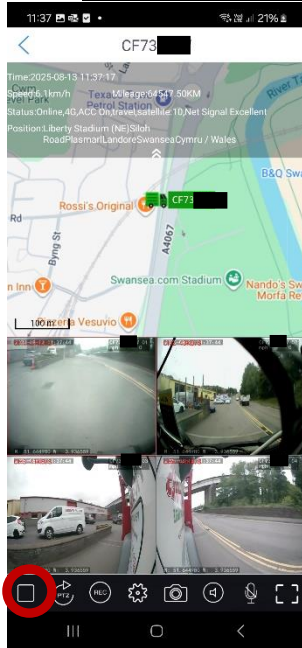

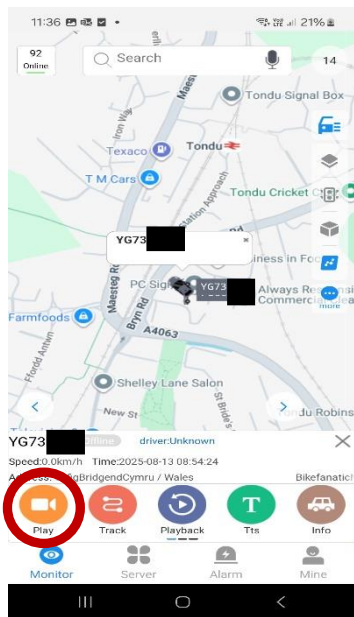

Vehicles in **Purple** can indicate an issue with the GPS, this could be because the vehicle is in a poor tracking area or there's a fault with the GPS.

Vehicles in **Yellow** have their ignitions off but the DVR hasn't shut down yet.

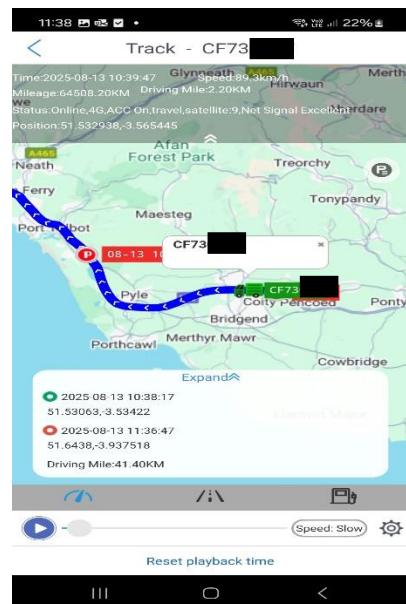

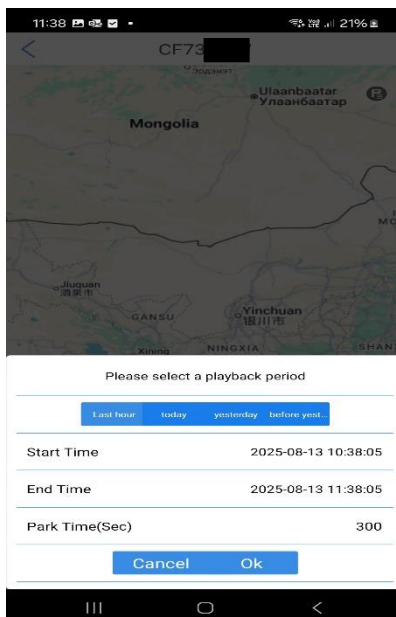

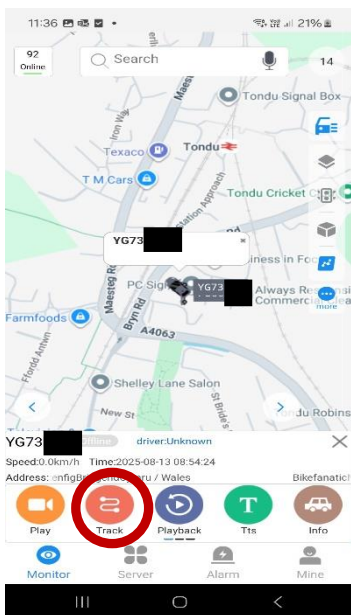

Click on the vehicle you'd like to view and it will bring its current location.

LIVE VIDEO STREAM

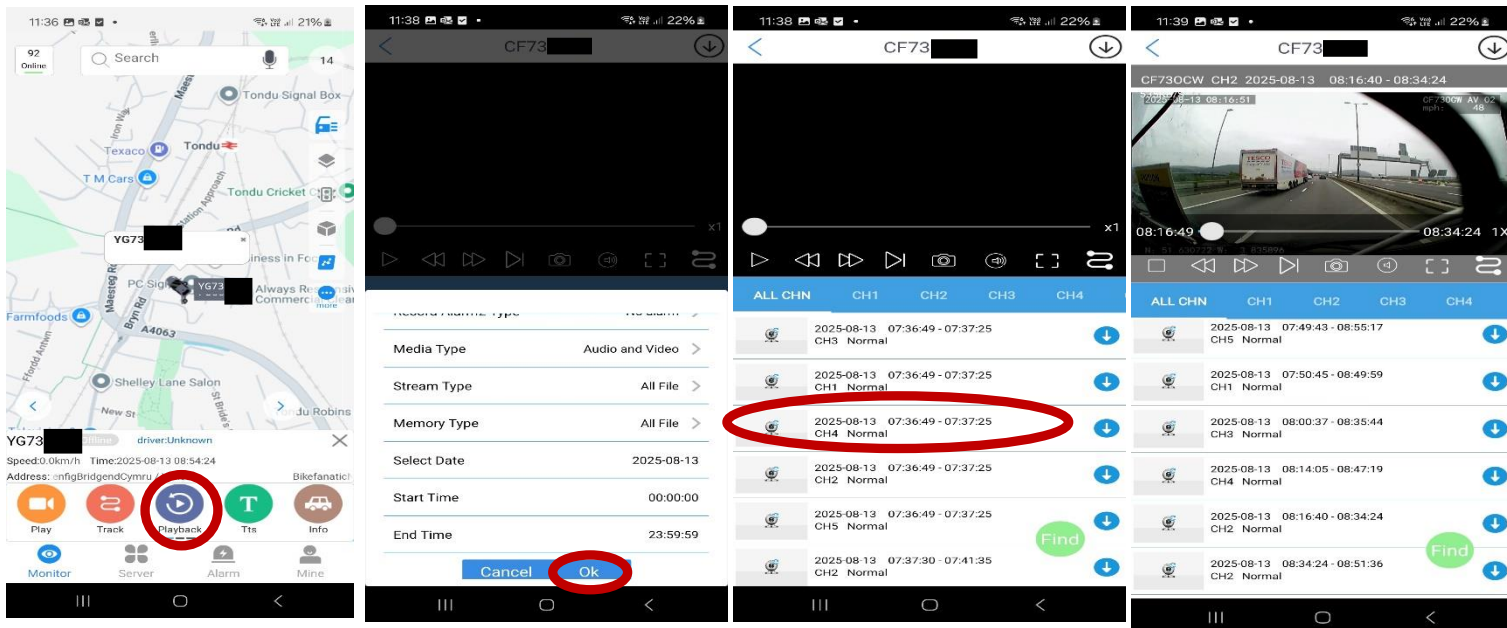

First search for the Reg of the vehicle you want to view and select it, then click on “Play”, this will then show live footage from the vehicle. When finished make sure the stop streaming button is pressed (Circled above)

HISTORIC TRACKING

First search for the Reg of the vehicle you want to view and select it, then click on the “Track” icon, then enter the date and times you require, and the App will display the route and speeds of the vehicle in the given time.

HISTORIC VIDEO PLAYBACK

First search for the Reg of the vehicle you want to view and select it, then click on the “Playback” icon, then enter the date, start and end time and press “Ok”, A list of video files will be displayed. Select the file you require, and it will begin to play.

REMINDER: VEHICLE MUST BE ONLINE TO PLAY BACK RECORDED FOOTAGE
