

Depot Live View Security Checklist

Use this checklist before implementing or auditing a live view system for fleet depot and yard monitoring.

BACKWATCH

backwatch.co.uk · Vehicle Safety Equipment

System capability

- ☐ Remote camera access: feeds viewable on mobile and desktop
- ☐ Ignition-off operation: cameras active when vehicle is parked
- ☐ Cellular/Wi-Fi signal adequate at your specific depot location
- ☐ Alert delivery: notifications route to a duty officer — not just email

Configuration

- ☐ Geofence boundaries defined for each depot/yard site
- ☐ Out-of-hours windows set to reflect actual shift patterns
- ☐ Parking mode / stationary motion detection enabled on high-risk vehicles
- ☐ Alert sensitivity calibrated (not too high, not too low)
- ☐ Camera offline alerts enabled for all vehicles on depot

Footage and evidence

- ☐ Cloud storage enabled with timestamped footage
- ☐ User-level access control configured
- ☐ Footage retention period documented in data retention policy

Compliance

- ☐ Staff informed cameras are in use (GDPR / UK GDPR signage in place)
- ☐ Data retention policy documented and communicated
- ☐ Alert chain tested end-to-end with a known out-of-hours movement
